

Chrome Vanadium Construction:
Forged from high quality chrome vanadium steel, precisely hardened for increased durability

Unique Patented Design:
30% slimmer & lighter than normal pear head ratchet, provides higher torque & extended service life

Unique Patented Design
Gourd shaped head is 30% narrower than regular oval shaped ratchets making these most suitable for use in tight & hard to reach areas

Slim Line Ratchet
More than 9 Teeth Bite of Gear is designed to transfer extremely high torque and extend the service life

Normal Type Ratchet
Only 3 teeth bite, unable to transfer the torque powerfully and efficiently

Ratchet body is 30% slimmer than regular ratchet handles. This reduces the weight of the ratchet handles & provides high torque

60 Teeth With 6 Degree Control
Provides extremely high torque for professional users

Quick Release
Simply push the release button with one thumb for replacing sockets quickly and efficiently

Reversible Lever Switch
Reversible lever switch makes it easy to switch direction of use
